About Us

Arrow Green Logistics (AGL) is a fast-growing logistics company providing a full range of transport and warehousing services throughout Central Asia. We have been operating in the market for over 10 years, focusing on service quality, reliability and long-term partnership.

AGL provides all-in-one solutions in the field of freight transport, forwarding and warehouse logistics. In 2025 we continue to expand our customers' capabilities by introducing off-dock terminal and warehouse logistics. Our approach is based on modern technologies, digital marketing and transparent business processes.

We strive to become a strategic partner for our customers by offering flexibility, cost optimization and high standards of service.

Our History

2016
Arrow Green Logistics is established with a fleet having 20 “MAN” haulers and 20 “Krone” semi-trailers.

2017
The fleet is expanded with 10 “MAN” haulers.

2018
Our fleet is expanded with 10 “Schmitz” semi-trailers.

2019
AGL bought out Reliable Trans company and expanded its fleet.

2020
AGL is top-ranked by The Ministry of Transport of The Republic of Uzbekistan as a leading transport company.

2021
AGL joined WCAworld - The largest and most prominent network of independent freight forwarders.

2022
500,000 tons of transported cargo is reached - an important milestone in our history.

2023
The historical amount of rail transport exceeded 100,000 tons.

2024
AGL completed construction and commissioned its own modern office space.

2025
- AGL made a strategic agreement for the management of Universal Logistics Services Container Terminal, the largest in Tashkent.
- AGL joined JCtrans International Logistics Network and expanded its capabilities for global cooperation
- AGL reached the historical 1,000,000 tons of transported cargo

Mission:
To be a reliable link in the customer’s team with a focus on their sustainable growth, providing comprehensive solutions to logistics challenges - from route and cost optimization to prompt and high-quality delivery.

Vision:
To form a modern logistics company focused on efficiency, innovation, and reliability in addressing logistics challenges of any complexity.

Key Activities

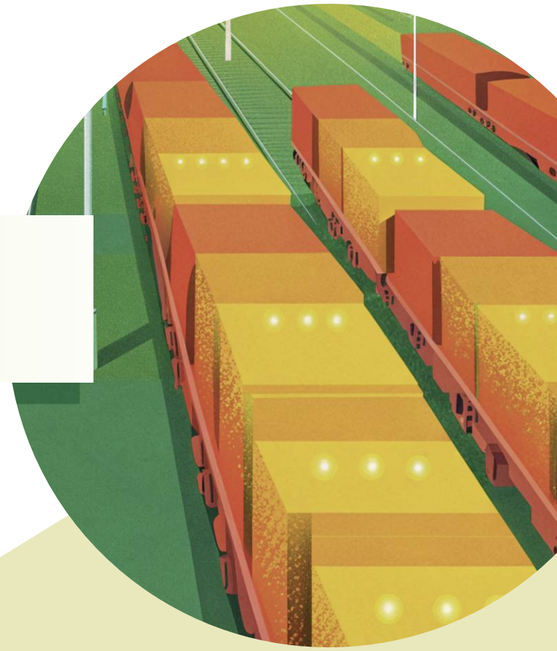

Acceptance and handling of dangerous goods – compliance with all safety standards and regulations.

Transport logistics – international and regional transport, forwarding, multimodal solutions.

Brokerage services - customs clearance, certification, screening

Arrangement of block trains - efficient railway logistics for bulk supplies.

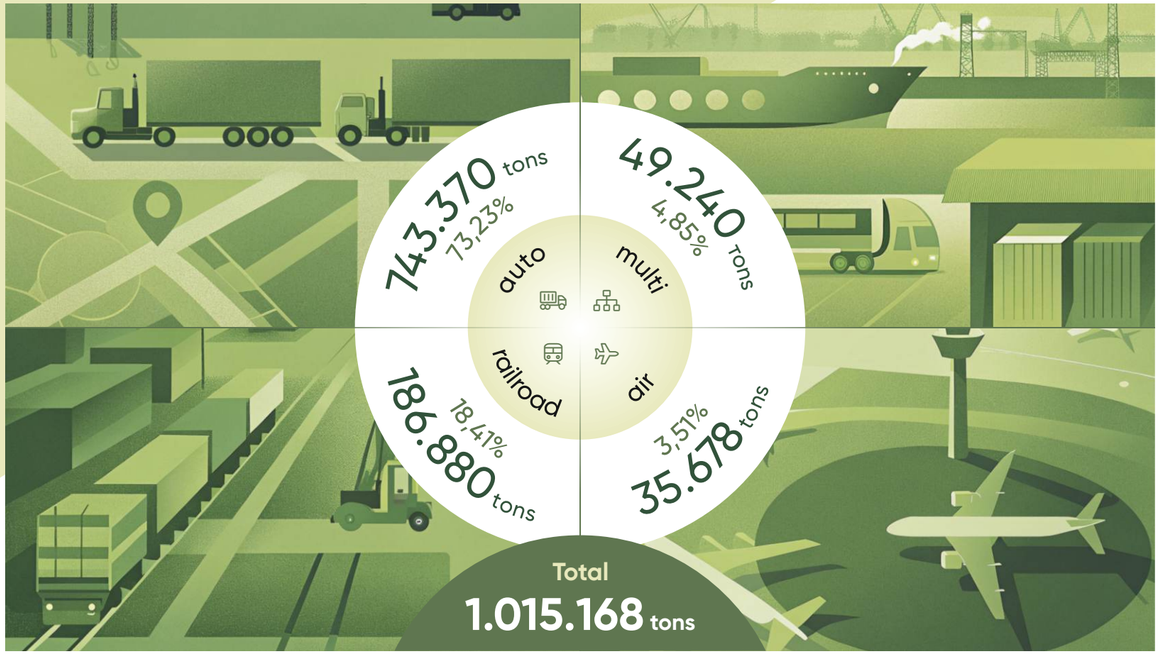

Warehouse logistics – Class A, B warehouses. Responsible storage, cargo handling.

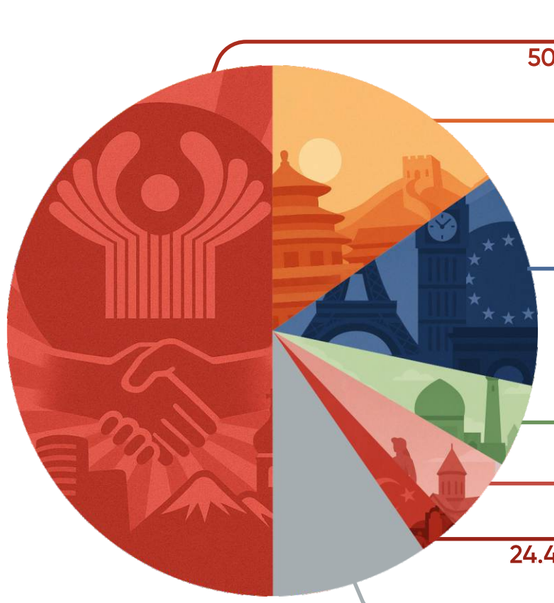

Customer-oriented logistics solutions – development and management of custom-designed logistics strategies.

Terminal Universal Logistics Services

Advanced terminal complex; It is one of the largest terminal complexes in the region providing advanced solutions for goods storage and handling.

Terminal specifications:

- Total area of the terminal: 19.4 ha
- Class A warehouse – 5,000 m2
  - commercial warehouse – 3,500 m2
  - bonded warehouse – 1,500 m2
- Class B warehouses, 3 pcs. – 5,800 m2
  - warehouse 1 – 2,800 m2
  - warehouse 2 – 2,500 m2
  - central warehouse – 500 m2
- 9 railway lines
- Simultaneous capacity: up to 12,000 TEU
- Unloading area: up to 150 freight cars and 20 big rig trucks
- Machinery: 6 “Konecranes” reachstackers, 13 pcs. diesel-engined and 20 electric forklifts

Terminal Advantages

Strategic location – the terminal is located in a key logistics zone providing convenient access to transport corridors.

High throughput - processing capability **up to 50 freight cars and 20 trucks per day.**

Integrated Chukursay customs checkpoint – expedited customs clearance on the terminal territory.

Modern management technologies - the implemented **Axelot, SOLVO TOS, and WMS** provide automated warehousing and terminal operations control.

Well-developed infrastructure – advanced equipment for loading and unloading operations, warehousing, and cargo handling.

Flexibility in handling different types of cargo – handling of container, wagon, consolidated and oversize cargo.

Qualified specialists – operating management of warehouse and logistics processes.

Ability to deploy up to 100 personnel for handling cargo during peak periods.

Comprehensive services – cross-docking, safekeeping, temporary storage warehouse (TSW), customs clearance.

Road Transport

We carry out cargo transport using all types of vehicles, selecting optimal solutions for each task.

We offer:

- **Tilt-covered vehicles and lorries with sides** – universal transport for various goods.
- **Refrigerators** – delivery of temperature-sensitive cargo in monitored conditions.
- **Isothermal vans** – cargo protection from temperature drops.
- **Tanks** – transport of liquid and bulk materials.
- **Container trucks** – transport of sea containers by land.
- **Road trains and lowboys** – for bulky but not heavy loads.

Transport Types

Air transport

We arrange express delivery of goods by air transport ensuring speed, reliability, and monitoring at all stages.

An-124

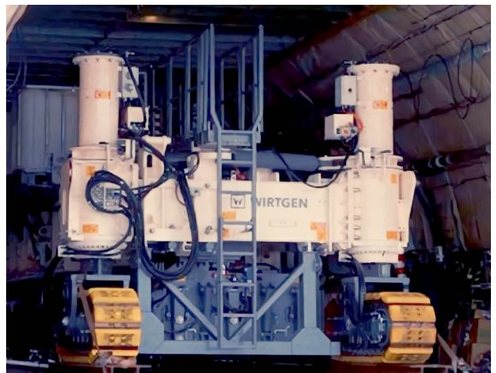

Our services:

- **Scheduled air transport -** cargo shipping to commercial flights worldwide.
- **Charter flights –** arranging customer-specific flights for urgent or non-standard cargo.
- **Transport of valuable and fragile goods -** we provide special packaging and careful logistics.
- **Transport of dangerous goods (DGR) -** full support in compliance with international IATA standards.

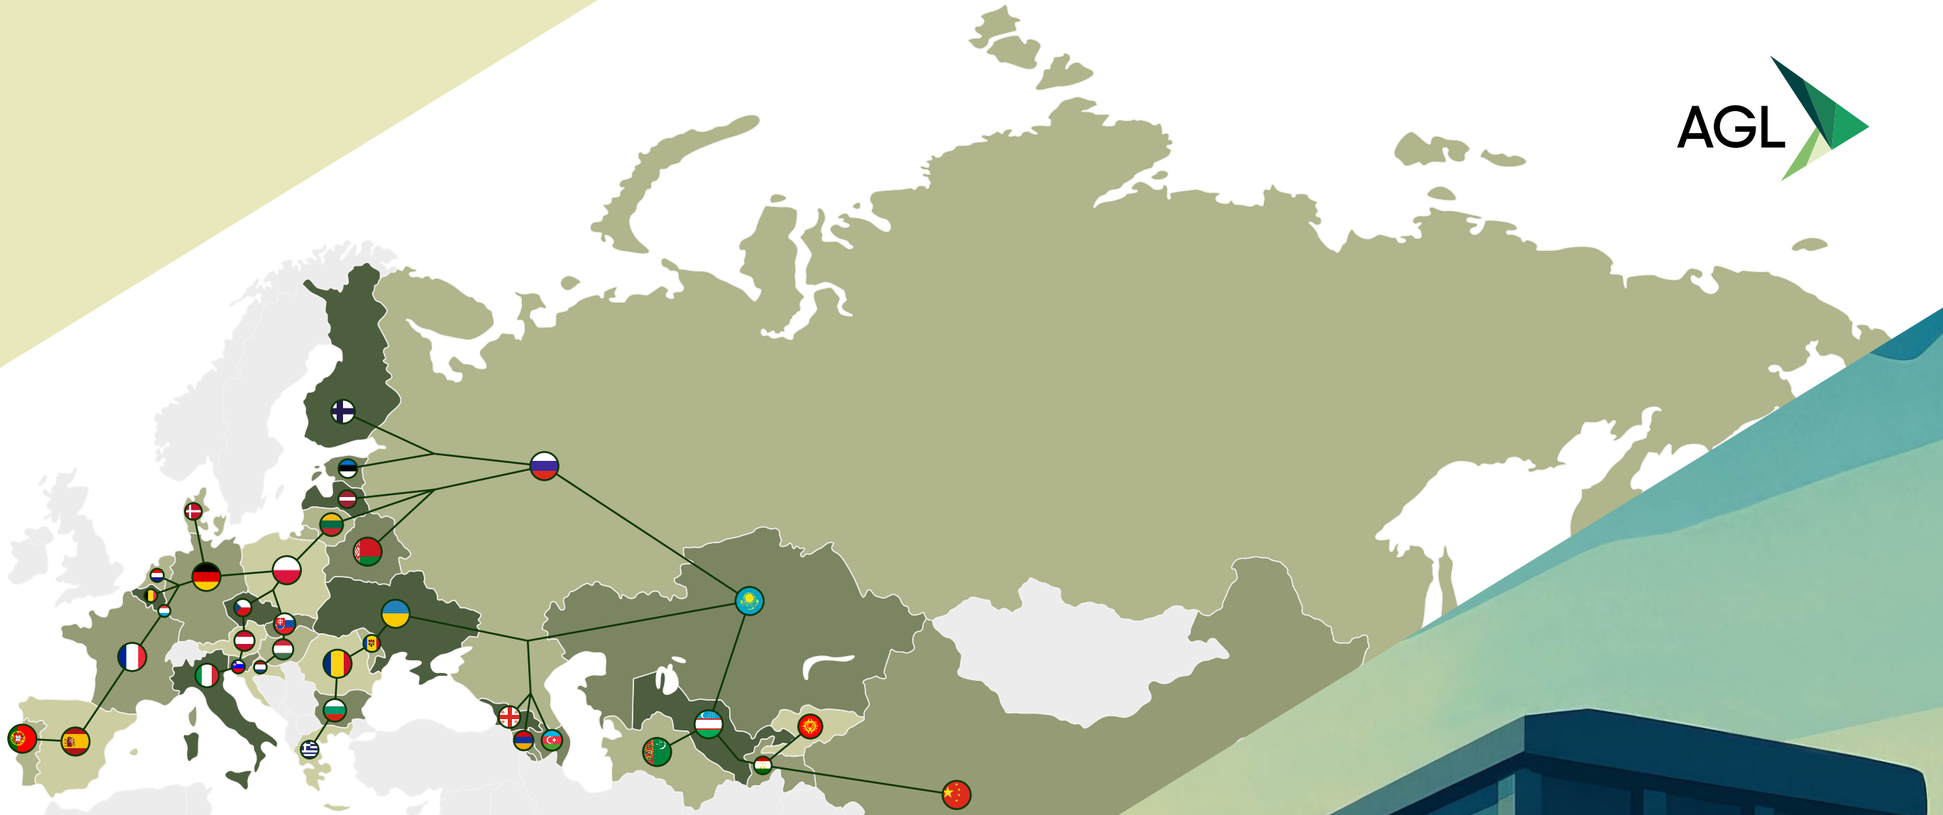

Railway Logistics

- **Container shipping** - regular shipments of boxed goods by international routes
- **Wagon freight** - transport of large-tonnage and special goods
- **Arrangement of block trains from/to** China - Central Asia - Georgia
- **Transit transport through Tashkent hub** with time and cost optimization
- **Full support** – monitoring and control of goods loading, paperwork, coordination of logistics flows

Multimodal Transport

We arrange **fully integrated logistics solutions,** combining several types of transport for optimal cargo delivery.

Our capabilities:

- **Combined routes** – a combination of road, air, rail, and sea transport .
- **Time and cost optimization** – selection of the best logistics schemes.
- **Unified monitoring at all stages** – from dispatch to receipt of cargo.
- **Customs clearance** – support for border crossings.
- **Transport of any type of goods including oversized,** temperature-sensitive, and hazardous goods.

Transport of dangerous goods (DGR) – reliably and safe

We transport **dangerous cargo of any category** in compliance with international standards and strict control at all stages.

Our capabilities:

- **Full compliance with ADR, IATA DGR, IMDG, RID standards.**
- **Special transport:** road (tanks, containers), air, rail, sea transport.
- **Paperwork:** MSDS, declarations, permits, labeling.
- **Control and support:** cargo monitoring, insurance, security (upon request).
- **Transport of all 9 categories of dangerous cargo including gases,** flammable liquids, corrosive and radioactive substances.
- **Route optimization** taking into account the specifics of the goods and customer's requirements.

Oversize Cargo Transport

One of our key services. We arrange transport of large-sized, heavy and non-standard cargo, taking into account all safety requirements and regulatory standards.

We offer:

- **Full cycle of transport** – from route coordination to delivery and unloading.
- **Development of customized logistics solutions** for each cargo.
- **Obtaining permits** and coordinating routes with regulatory authorities.
- **Use of special transport** (low-deck platforms, modular trailers, multi-axis trailers, etc.).
- **Cargo escort** with the engagement of patrol cars (if required).
- **Control at all stages** – from loading to final unloading.

Our projects

Project Cargo

- Analysis and development of logistics schemes considering cargo specifics and the route infrastructure
- Developing routes and coordinating the transport with government agencies
- Arrangement of special permits and support for the transport of oversized cargo
- Preparation and use of special rolling stock
- Coordination of cargo-handling operations using special machinery
- Control of deadlines, ensuring safety and cargo insurance

Amirsoy all-season mountain resort

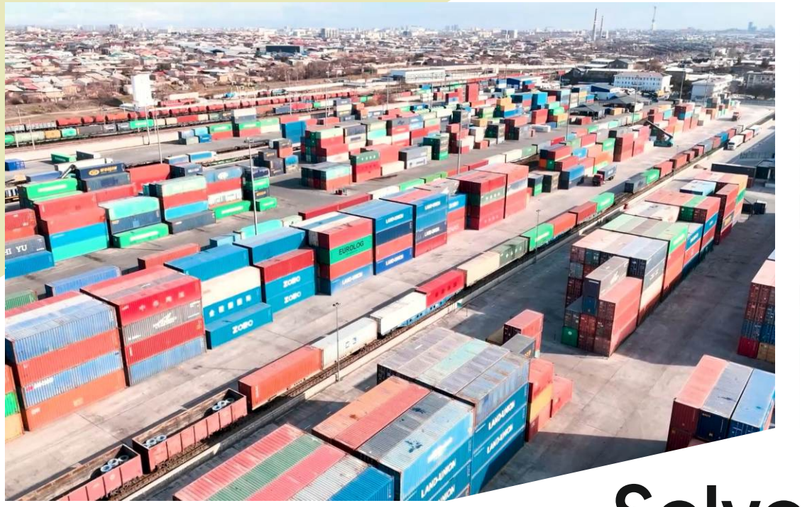

Ceramitech Group Brick Factory

Container Maintenance

- **Carrying out scheduled and unscheduled repairs** of containers to maintain performance reliability
- **Serviceability check and certification** of containers for international transport
- **VGM (Verified Gross Mass) certification** with full maintenance and defect repair
- **International standards compliance Monitoring** and pre-shipment maintenance

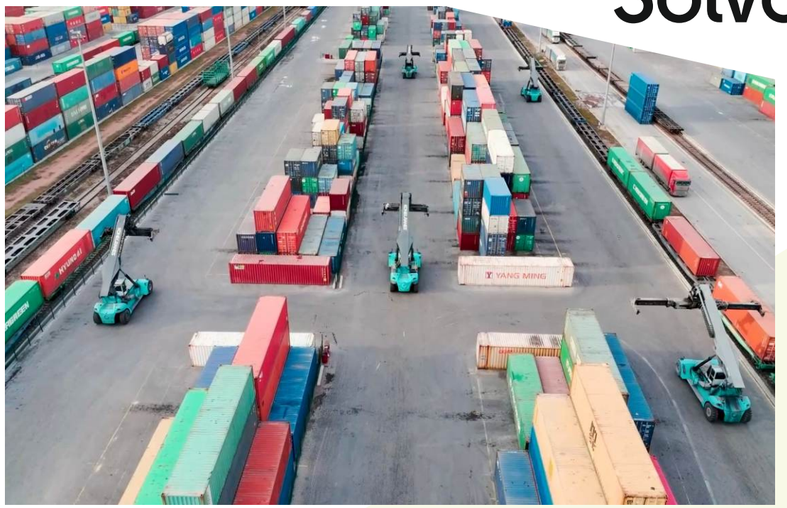

Container turnover

- **Shunting and storage of empty containers** at the off-dock yard
- **Efficient container yard management,** minimizing downtime and improving logistics processes
- **Safety and condition checks** of containers before further use.
- **Repair and maintenance** including damage repair

Solvo.TOS

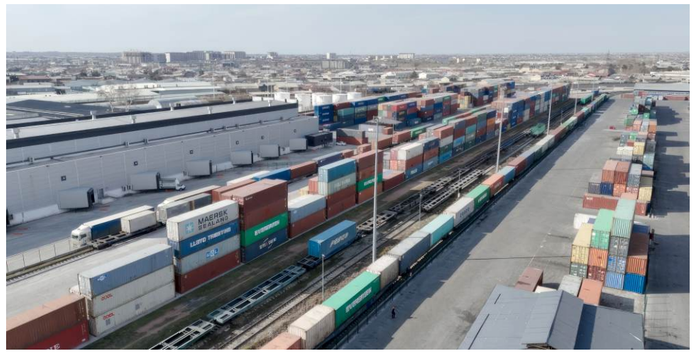

Warehousing

Class A warehouse:

5,000 m2 equipped for rack and floor storage **with temperature control within 15-25°C.**

Storage capacity:

Up to 12,000 TEU.

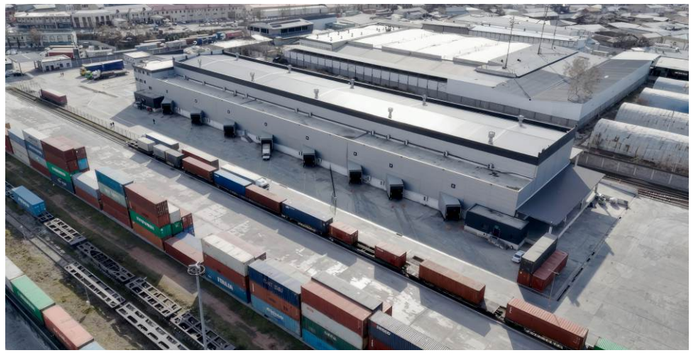

Class B warehouse:

5,800 m2 for storing goods.

Terminal Turnover capacity:

Up to 200,000 TEU a year.

Examination area:

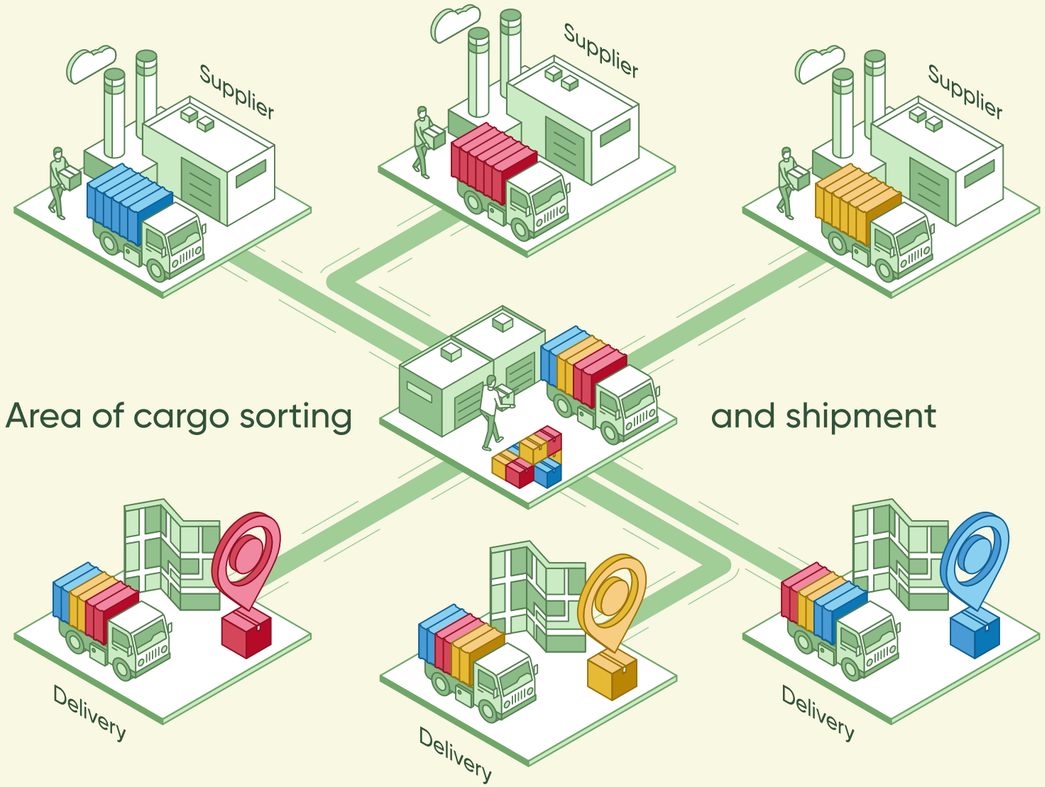

Open area of **300 m2** allowing simultaneous examination of **up to 44 TEU.**

Unloading area:

Simultaneous unloading to **150 freight cars and 20 big rig trucks.**

Cross-Docking Services

Key features and advantages:

- **Transshipment of up to 20 trucks per day,** ensuring the smooth flow of goods
- **Capacity to deploy up to 100 personnel** for accelerated processing of large batches of cargo
- **Handling of up to 50 freight cars per day** with prompt cargo processing
- **Transshipment of cargo** without delays and warehousing
- **Optimization of logistics flows** by reducing cargo handling time
- **Flexibility in handling different types of cargo,** including pallet, container and oversize shipments

Customs Brokerage Services

Key Services:

1. **Comprehensive customs clearance –** preparation, submission and support of declarations
2. **Support in transit procedures -** accelerated transfer of cargo for further shipment
3. **Temporary storage warehouse (TSW) –** allocation and processing of cargo under customs control
4. **Consulting services on international commerce –** development of optimal strategies for clearance and minimizing customs costs
5. **Trade Import and Export Classification of goods –** estimation of customs duties and certification procedures
6. **Securing local approvals –** obtaining certificates, veterinary and phytosanitary evaluations and reports
7. **Relations with customs authorities –** support in processing and prompt settlement of disputes

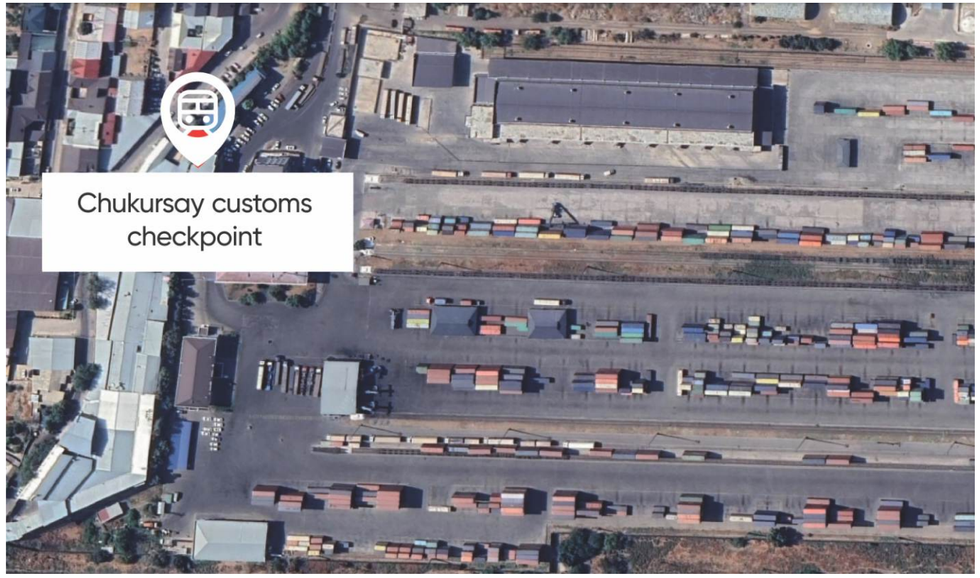

Arrow Green Logistics Advantages:

Regular customs declarants – support for all activities, professional approach, and risk reduction

High processing speed – decrease of delays, shortening of processing timelines and increase of efficiency of all logistics operations

Chukursay Customs Checkpoint located on our terminal territory – direct integration with customs authorities allowing for faster processing and prompt resolution of issues

Transparency and compliance with international requirements - full adherence to regulatory requirements, reduction of administrative barriers and prevention of possible regulatory risks

3PL Services

Manufacturer | Packing | Warehousing | Delivery | Market

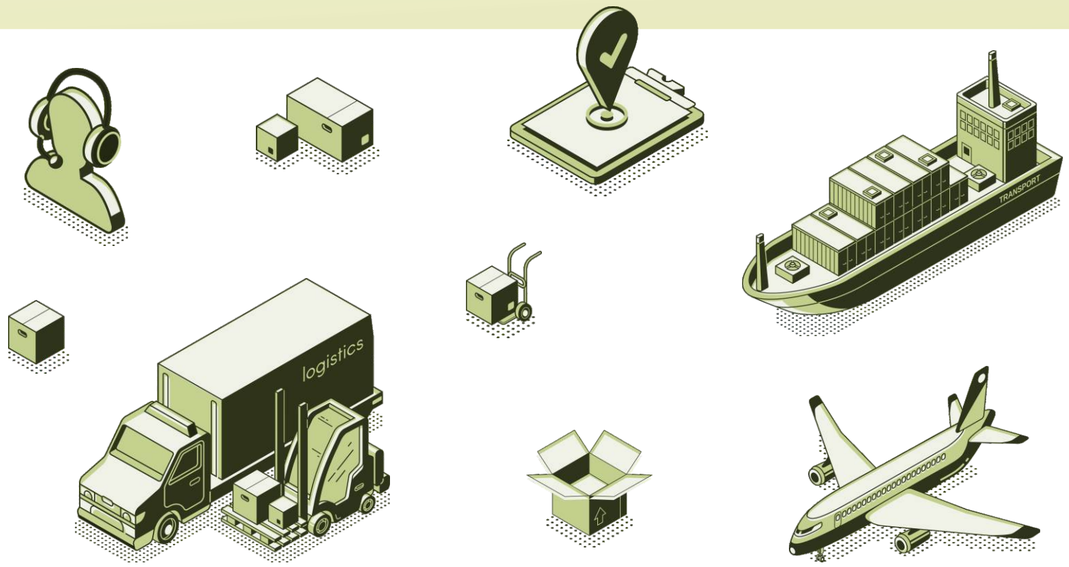

Arrow Green Logistics provides **3PL operator** services ensuring complete outsourcing of logistics processes. We take care of the management of transport, warehousing and customs operations which allows customers to focus on their business development.

What We Offer?

1. **Transport Logistics** – arranging international and regional transport, multimodal solutions
2. **Warehouse Logistics** – storage, processing and distribution of cargo within terminal facilities
3. **Cross-Docking** - accelerated cargo handling without interim storage
4. **Storekeeping** – monitoring and control of cargo traffic and warehouse stock
5. **Customs support** – a full range of services for registration and declaration

What We Have for 3PL Services

- **Terminal facilities** – efficient cargo handling and storage
- **Skilled specialists** – professional management of logistics processes
- **Smooth-running transport chains** – a wide network of carriers and partners
- **Package approach** – enhanced logistics considering individual customer's needs

Optional Extra

Empty containers (purchase/ sale/ rent)

- Service for sale, purchase and rent of empty containers within CIS countries.
- Containers of different types and sizes (20′, 40′, etc.) for various business needs.

Receiving and forwarding cargo to the customs terminal

- Service for customers who can consign and receive cargo at the terminal address.
- Simplification of logistics processes through a single hub for processing and dispatching cargo.

Completed projects

Amirsoy Resort

Transport of two rope reels for an all-season ski resort project Amirsoy.

GDF factory

Transport of more than 200 tons of plums, nectarines, and frozen cucumbers for Gold Dried Fruits.

Hotel in Khiva

Transport of revolving doors from Ankara to Khiva

Brick factory

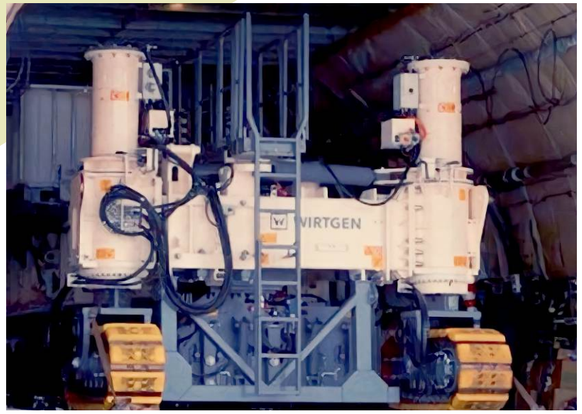

The cargo included factory equipment, construction materials, and bricks; transported from Germany and Greece to Akhangaran.

Completed projects

Concrete paver transported by An-124 aircraft

Air transport of Slipform Paver SP 1200 concrete paving machine by An-124 aircraft.

The United Nations Project

Agricultural goods transported for the United Nations project

Binket Factory

110 tons of MDF sheets were transported for the Binket plant. Delivery was completed within the specified time frame.

Wheat seeds

178 trucks transported wheat seeds within one month. The total cargo amount was more than 4,000 tons.

Regular Cargo

Consumer goods

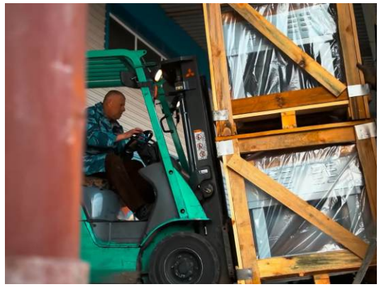

Confectionery

Baby food

Appliances

Chemical industry

Orthophosphoric acid

Potassium silicate

Titanium Dioxide

Construction materials

Ceramics

Basalt wool

Paints

Agricultural products
